

ENVIRONMENTAL POLICY

IE “Garagum Hazynasy” management, realizing its responsibility for the potential impact of the activity on the environment, undertakes to be guided by the following principles:

- comply with the requirements of the current environmental legislation of Turkmenistan, as well as the regulatory requirements of the Customer;
- strive to select the most effective means of environmental management: use technologies, equipment and materials in work that have a minimum harmful effect on the environment and allow the rational and efficient use of natural and energy resources;
- make management decisions based on the results of industrial environmental control, internal audits and analysis of the impact of activities on the environment;
- at the stage of development of project documentation, provide for measures to ensure environmental safety in the implementation of design solutions and the operation of the designed facilities;
- carry out constant raising of the level of awareness, competence of the personnel in matters of environmental protection through regular training;
- provide all the necessary infrastructure, including equipment, personnel, technology, work premises for the effective functioning of systems.

We are also conscious of the vital necessity to preserve and protect the environment for future generations. To this end, we carefully monitor our processes in order to guard against negative environmental impact.

The management of IE “Garagum Hazynasy” assumes the duty and responsibility for the implementation of this Policy in the field of the environment, effective functioning and continuous improvement of the environmental management system in accordance with the requirements
